The removable wheels by MCS were designed specifically for loading and unloading portable storage containers. The large pneumatic wheels are ideal for use with roll off trailers or roll back trucks. The unique swivel wheels make it easy to keep the storage containers centered on any trailer or truck. Pneumatic swivel casters are great for moving any heavy load.

Easy to use on unpaved surfaces, gravel, dirt or construction sites. Container wheels that work on any surface. Maneuver heavy loads easily.

Insert them directly into the receiver slots on MCS containers. Easy to put on and take off. You only need one set of removable wheels no matter how many containers you use. Take them with you for any job. Once set of wheels is all you need.
